The ability to place a dental implant in the intended position is priceless; it often allows for a less invasive surgical procedure and supports a more aesthetic design of the definitive prosthesis. The RealGuide Software Suite offers everything you might need for precise planning and predictable placement of dental implants. It consists of several software modules that may be combined as desired for a thorough diagnosis, intended implant positioning, and advanced surgical guide design.

PLAN

"PLAN" MODULE

- Superimpose a digital impression or prosthetic design (STL) with a CBCT scan (DICOM)
- Trace relevant anatomical structures and place the desired implants
- Plan implants and abutments from an extensive, open library
- Share the created files within the multidisciplinary team

APP

"APP" MODULE

- Download the RealGUIDE app to your iOS devices
- Manage your projects from any location
- Place your virtual implants with a fingertip
- Message and share data with other team members

RealGUIDE™ S
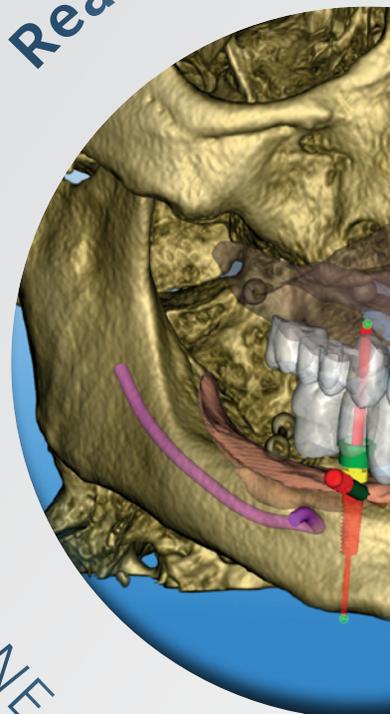

ONE SOFTWARE. M

RealGUIDE is a robust and complete software that provides me with the ability to choose how involved I want to be in the digital workflow. I can print guides in-house or work closely with a lab in an easy-to-use interface whether, it's a single unit or full arch plan. This is a game changer!

Amar Katranji, DDS MS, Periodontist, Michigan Implants and Periodontics

The RealGUIDE Planner and APP combined with the powerful cloud sharing greatly increases our ability to communicate efficiently with our referrals, and our employees are no longer constrained by dongle-based licenses. They can work on any computer at any time! For both straightforward and complex cases, RealGUIDE meets our high demands for an efficient yet advanced treatment planning and surgical guide design software.
